JOHN PAUL R. RUIZ

Full-Stack Web Developer | React.js • Node.js • Express.js • PostgreSQL
Mangaldan, Pangasinan, Philippines | johnpaul.ruiz003@gmail.com | 09692766427
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Aspiring Full-Stack Web Developer specializing in React.js, Node.js, Express.js, and PostgreSQL, with experience building database-driven applications and leveraging AI-assisted tools to streamline development, debugging, and system optimization. Skilled in both frontend and backend development, including web applications, RESTful APIs, and database-driven systems.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Typescript, React.js, Next.js, Node.js, Express.js, HTML, CSS
Databases & APIs: SQL (PostgreSQL), REST APIs
Tools & Platforms: Git, GitHub, Render, Vercel, Microsoft Office, AI-Assisted Development
Professional Skills: Problem-Solving, Communication, Teamwork, Adaptability

PROFESSIONAL EXPERIENCE

Administrative and Data Management Intern | San Fabian Municipal Office of Population *April 2025 – July 2025*

- Encoded and maintained population records using Microsoft Excel.
- Assisted citizens with inquiries and administrative services.
- Verified and updated demographic data to ensure record accuracy.
- Organized digital and physical documents for efficient retrieval.
- Generated reports and supported office data management activities.

Freelance Full-Stack Web Developer *June 2026 – Present*

- Designed and developed custom web applications for clients using React, Node.js, Express, and PostgreSQL.
- Implemented REST APIs, authentication, reporting, and database management.
- Developed custom web applications from concept to deployment based on client requirements.
- Deployed applications using modern cloud platforms.

TECHNICAL PROJECTS

Lakay Ago / Aroo Management Hub | Full-Stack Web Developer *August 2026 – Present*

- Developed and deployed a full-stack restaurant management system using Next.js, React, TypeScript, and PostgreSQL (Supabase) for two restaurants, Lakay Ago and Aroo, replacing manual attendance, payroll, inventory, and sales record-keeping workflows.
- Built a responsive React interface that works on both desktop and smaller screens, with dedicated modules for employees, attendance, payroll, inventory, sales, and service bookings, brand-specific app modes, and restaurant-scoped access through Better Auth so each restaurant's staff work only with their own data.
- Developed RESTful APIs and database triggers on PostgreSQL to automate payroll computation from fingerprint attendance Excel imports, recipe-based inventory deduction with unit conversion, and catering and service booking transactions, reducing reliance on manual calculations and spreadsheets.
- Implemented interactive payroll and attendance reports with charts, along with Excel and PDF exports of payroll reports and payslips and live updates through Supabase Realtime, helping management monitor attendance, payroll, stock levels, asset usage, sales, and expenses from one centralized system.
- Worked directly with restaurant management to identify inefficient manual processes, translate business requirements into system workflows, and continuously improve the system based on actual day-to-day operations.

RCLPG Inventory and Management System | Full-Stack Web Developer *June 2026 – August 2026*

- Developed and deployed a desktop-first inventory and sales management system using the PERN stack (PostgreSQL, Express.js, React.js, Node.js) for an LPG retail business, replacing manual inventory, sales, and customer record-keeping workflows.
- Built a responsive React.js interface optimized primarily for desktop operations, while maintaining mobile responsiveness for users who need access from smaller screens.

- Developed RESTful APIs with Node.js and Express.js and integrated PostgreSQL to automate inventory tracking, sales recording, customer credit management, LPG tank exchanges, and financial reporting, reducing reliance on manual calculations and spreadsheets.
- Implemented business-specific workflows and analytics to help the client monitor stock levels, tank movement, credit balances, sales performance, and expenses from a centralized system.
- Worked directly with the client to identify inefficient manual processes, translate business requirements into system workflows, and continuously improve the deployed system based on actual day-to-day operations.

BigMLPG Inventory and Management System | Full-Stack Web Developer *July 2026 – Present*

- Developing and deploying a mobile-first inventory and sales management system using the PERN stack (PostgreSQL, Express.js, React.js, Node.js) for an LPG retail business, digitizing manual inventory, sales, and customer management processes.
- Designed mobile-first React.js interfaces optimized for fast use on smartphones, while maintaining a responsive web layout for desktop and larger-screen access.
- Developed RESTful APIs using Node.js and Express.js with PostgreSQL to automate inventory updates, sales recording, customer credit tracking, LPG tank exchanges, and financial data management previously handled through manual records.
- Implemented streamlined mobile workflows that allow staff to record transactions, check inventory, manage customer balances, and review business data directly from mobile devices, reducing the need to rely on desktop-based processes.
- Collaborated directly with the client to identify operational bottlenecks, gather requirements, and iteratively improve the system based on real-world usage and day-to-day business needs.

Municipal Office of Population Web Portal | Full-Stack Web Developer *August 2025 – February 2026*

- Developed a full-stack web portal to improve the management, accessibility, and organization of population records and administrative information for the Municipal Office of Population.
- Designed and built a full-stack web application using React.js, Node.js, Express.js, and PostgreSQL, implementing dynamic interfaces, RESTful APIs, and optimized database schemas.
- Integrated Mailjet and TextBee APIs into the system's backend to automate email and SMS notifications, handling API requests and notification workflows for appointment confirmations, updates, and user communications.
- Collaborated with municipal stakeholders to gather requirements, validate workflows, and deliver enhancements aligned with real-world administrative processes.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science — Don Mariano Marcos Memorial State University, Graduated May 2026

Relevant Certifications:

- JavaScript Foundations Professional Certificate — Mozilla (LinkedIn Learning)
- Docker Foundations Professional Certificate (LinkedIn Learning)
- React Foundations — Pearson (LinkedIn Learning)
- SQL Essential Training – Walter Shields (LinkedIn Learning)
